Experience

WEB DEVELOPER | 04/2019 - Current

Thomas Poe - Toronto, Canada

- Designed websites, portals and large-scale web applications for multiple clients.
- Created images and redirect links for use in marketing and email campaigns.
- Built layouts according to customer parameters using HTML5 and CSS3.
- Leveraged REST services and other third-party APIs to shorten development times and expand product capabilities.
- Coded user-customizable applications to convert raw data from design engine to graphical formats.
- Handled special web projects designated by senior developer and chief marketing officer.
- Leveraged [Type] optimization techniques to boost website speed and performance.
- Used [Software] to build mix sets and streaming audio files for use on websites.
- Assisted end users by maintaining and supporting both Windows and Mac-based computers.

SOFTWARE ENGINEER | 12/2015 - 11/2018

Rachel Green - Toronto, Canada

- Worked with backend personnel to design structure and processes optimized for product parameters.
- Wrote, tested and deployed code, verifying operational and UX integrity for releases.
- Developed user interfaces for compatibility with display formats per customer requests and client-provided parameters.
- Performed regression and performance tests for updated systems.
- Drafted design objectives and system design documents.
- Gathered customer feedback and worked to resolve specific concerns.
- Collaborated with agile development team to test, develop and maintain web and desktop-based software applications.
- Met with stakeholders, product teams and customers throughout system development lifecycle.
- Scheduled ongoing performance quality assurance checks for software applications and automated performance test scripts.
- Engaged with user experience designers crafting clean interfaces with simple, intuitive interactions and functions for software package.
- Assessed organization functions and needs to design business applications meeting or exceeding client expectations.
